

## We are in the business of aiding people and businesses.

Our name says we consult, which is true, but unlike most consulting companies, we don't just dispense information for a fee. Our mission statement says "To provide assistance and help to people and businesses by providing unique uses of technology and common sense in solving their day to day problems." Our principle clients are individuals with physical or mental handicaps, the elderly, those in need of assisted living, small businesses and non-profit groups. Please call us for quotes on any equipment or services you need, or visit our website at <http://www.corpierconsulting.com> for an online catalog of products and services available. We are here to provide service to our clients. As our "mascot" Ralph the butler represents, and the "Ralph" product itself says "How may I be of Service"

## Providing services and products for the services industry and the general public.

Corpier Consulting Services has been providing consulting services to the Hotel/Motel and restaurant industries for over 25 years with our "HotPack" Hotel management products and "A Touch of Cash" Restaurant systems. Our newest product line, "Ralph" provides sophisticated automation services to homes. Originally designed to assist a client with severe physical disabilities, the product has evolved to also manage home entertainment systems and provide mood control and security for any home.

Corpier Consulting Services also does custom programming and device development for special needs. We are a member of the Microsoft Developers Network (MSDN), keeping up-to-date on current

Microsoft technology. We have design engineers who can design and develop electronics systems for your needs. Talk to us about all of your programming and design needs.

We have partnered with several companies that provide assistive equipment to the handicapped and elderly, so check with us for all of your assistive, security and computer equipment needs.

We can be your key to a better life through technology!

## CONTINUING RESEARCH

We believe that continuing research and development is the key to maintaining a progressive product line. We were implementing touch screen point of sale equipment in the mid 1980's, over 10 years before most companies even considered them. Our current research and development is primarily for involves the "Ralph" products. Research is also being done on a mobile version of "Ralph" that can move around and provide even more assistance around the home (also known as a robot). From this commitment to the future, you can see we expect to be around for a long time and continue to be a technology leader.

## WE SPECIALIZE IN HELPING THOSE THAT NEED ASSISTANCE OR HELP OTHERS.

One of our major consulting customers is Special Olympics Missouri, we have created a custom system to manage their over 13000 Athletes, 8000 Volunteers and 300 yearly tournaments. We donate many hours of service to charitable organizations each year. Of course, "Ralph" is designed to help the elderly and handicapped live better lives. We have always been a company that helps people and organizations that help others.

Ralph is designed to assist the physically handicapped and elderly to live in their own homes longer.
