

Maintain your Independence

Ralph is designed to allow a person to live independently and safely in their own home by watching and helping. In many instances Ralph can allow people to stay in their home when they would have to move to an assisted care facility without such a system. Add the door control features and Ralph can keep you from having to open the door to find out who is there. The system has additional modules that can be added to include medication reminders, monitoring for movement in home, call specific people if certain conditions exist. Each Ralph

Ralph can call a list of people if the homes occupant needs help or some-

system consists of numerous modules that together allow the system to perform the required tasks and can have additional modules added as needed for additional capabilities. Modules are available in several categories

that include assistance to handicapped, assistance for blind, general home automation, home heating and air conditioning, home security, internet, home theater and remote control.

Imagine...

A product that can give you independence and Freedom in your own home

Meet Ralph your new assistant

Imagine a home that really looks out for and helps its occupants

Imagine just speaking to your house and it responds and does what you ask,

Ralph is more than just a computer program, it's a companion, helper and aid.

be it open the drapes, turn up the heat, turn on a light, open the

front door, turn on the TV, change channels, call someone for you, or even call for help.

Imagine

* a product that can help aging people, people with physical disabilities, or the blind, live longer in their own homes by doing physical things for them while monitoring the home.

* A home that can warn you of severe weather, read news headlines, read TV listings and many other convenience features.

* Imagine no more, the product that does all of this is here now and its called **RALPH.**
